Education

SRM Institute of Science and Technology **2022 – 2026**

B.Tech, Computer Science and Engineering (Software Engineering) • CGPA: 8.65/10 *Chennai, Tamil Nadu*

Technical Skills

Languages: Python, C++, C, JavaScript, Dart, SQL
Frameworks: Flutter, React, Next.js, Node.js, Express.js, FastAPI, LangChain, LangGraph
Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase
Tools: Git, GitHub Actions, Postman, Figma, Vercel

Experience

Infosys **January 2026 – Present**

Specialist Programmer *Full-time*

Specialist Programmer Trainee • Mysore *June 2026 – August 2026*

- Engineered a **Discharge Summary Agent** as a **LangGraph** state graph combining RAG retrieval, tool calling, conditional routing and structured outputs.
- Deployed the agent behind a **FastAPI** service and instrumented every run with **Langfuse** for tracing, evaluation and prompt iteration.

Power Intern, Agentic AI • Mysore *January 2026 – April 2026*

- Developed **RAG** pipelines and multi-step **LangChain** agents for enterprise knowledge management.
- Extended a **DeepWiki**-based knowledge platform to support contextual document search and automated knowledge retrieval.

Samsung PRISM **May 2024 – January 2025**

Engineer Intern *Remote*

- Designed an image-to-hashtag pipeline chaining 2 models: an **InceptionV3 + LSTM** caption generator and a **T5** hashtag generator.
- Fine-tuned T5 for hashtag prediction and prepared the image and text datasets used to train both models.

Projects

dsarecx | *Next.js, TypeScript, Prisma, Neon Postgres, Claude API* **[Live]** **[Code]**

- Solved DSA retention decay by shipping a full-stack **spaced-repetition** tracker on the Next.js App Router.
- Implemented an **adaptive scheduling engine** (3/7/14/30-day intervals, 90-day rechecks) as pure, **unit-tested**, timezone-aware functions.
- Indexed 18,000+ problems from 5 platforms via **Strategy-pattern** resolvers with **GraphQL/REST** fallbacks; pooled **Prisma** connections through **PgBouncer**.

Kosh | *Kotlin, Jetpack Compose, Room, WorkManager, Firebase* **[Code]**

- Eliminated manual expense logging with an **offline-first Android** finance app that captures transactions automatically.
- Parsed bank and UPI SMS on-device with a **BroadcastReceiver** and regex extraction, learning spending categories per merchant.
- Architected the app on **MVVM** with **Room** as the single source of truth, **WorkManager** sync to Firestore and a **Jetpack Glance** widget.

CheckLater | *JavaScript, Chrome Extension, PWA, Firebase* **[Live]** **[Code]**

- Created a **Chrome extension** and **PWA** that saves any link in one tap and syncs it across devices.
- Integrated context menus, keyboard commands and a **service worker**, replacing accounts with a **passwordless** 12-character sync code.
- Synchronized data through **Firebase real-time listeners** with offline persistence and deduplicated links via **URL normalization**.

Play-T | *Flutter, Riverpod, Node.js, Express.js, MongoDB* **[Code]**

- Transferred playlists across streaming platforms using **OAuth 2.0** and an adapter layer over each platform's **REST API**.
- Matched tracks across catalogs with **fuzzy string matching**; added validation and **rate-limiting** middleware.
